October 2006

President's Corner

Greg Wilson, Chapter President, 2006 -2007

I hope you had a chance to attend the last chapter meeting. We introduced this year's board members and committee chairs. If you couldn't make the meeting, please take a moment to introduce yourself to them. They are key in making our chapter what you want it to be. Their names and contact information are listed on our chapter web site at www.asselv.org on the officers' page.

October's meeting will be back at the Main Street Station at our normal meeting time and place. The technical topic for the meeting will be a presentation on avian flu pandemic preparedness from a representative of the Southern Nevada Health District (formally Clark County Health District).

ATTENTION TO MEMBERS!

By order of the Chapter Executive Board, your presence is requested at the next Chapter Meeting!

Date: October 11th, 2006

Pandemic Flu Response

Location:

Main Street Station,
Pullman Grille

Time: 7:00 a.m. - 9:00 a.m.

Our chapter is constantly growing and that growth requires more people doing more things.

The chapter is sending Doug Sharp our Vice President and Loren Pierce, our Treasurer to the Annual ASSE Leadership Conference being held October 5th to 7th in Chicago. I look forward to hearing their report when they return. See you at the next meeting.

The October Meeting will be back at the usual location on Wednesday, October 11th, 2006 at Main Street Station, Pullman Grille (until we outgrow it!), from 7:00 a.m. – 9:00 a.m.

Topic: "How to prepare for the bird flu or other potential pandemics this winter"
presented by a representative of the Southern Nevada Health District

Future Meeting Locations and Times:

October 11 th , 2006	November, 2006

MSA ALERT/RECALL!!!!

The following MSA alert/recall for a model of their self-retracting lanyards (model: Aptura LT 30, manufactured before July 1, 2006) could be a good article for the Safety Net (or direct E-mailing to the general membership). MSA has found that when engaged, this model of lanyard could allow up to 42 inches of "travel" before fully arresting the fall.
