MS-I \$399	MSHA New Inexperienced Surface Miner [24 Hr]	March 9-11

Now Offering OSHA 10 & 30-Hour Training for the Construction Industry

OSHA is now requesting that construction personnel have a minimum of 10-Hour training on certain required safety topics. In the near future, this may become mandatory for those companies bidding on large construction jobs. Is mandatory 30 hour training coming soon?

Don't miss out on bidding opportunities because your construction personnel lack the training and qualifications for these projects. Improve the productivity and safety of your workforce. Reduce your risk of OSHA fines and increased workers' compensation insurance premiums.

We can offer this training, with card certification, for clients who wish to take advantage of this special opportunity to get this valuable training on a schedule that meets your needs.

- **10-Hour training can be spread out over several days, so employees are trained in smaller groups to minimize company disruptions**
- **30-Hour training can be spread out over a six month time period to maximize employee productivity and lessen "down time"**
- **Certain topics can be custom designed to fit your particular training requirements**
- **Cards issued for each full time class attendee**
- **Immediate certificate of training issued with OSHA cards received within 4-6 weeks**

OSHA 10 Hour: February 2-3, 2009

OSHA 30 Hour: January 12-15, 2009

Classes are being held at our Las Vegas Training Center. Register Today!

Now Offering OSHA 10 & 30-Hour Training for General Industry

SCS Engineers is proud to announce that we can now offer OSHA 10 & 30 Hour training for general industry. This course is designed for safety officers, shop foremen, field supervisors, risk assessors and any others who need information on OSHA general industry regulations.

Course content includes an introduction to OSHA and what to expect when an inspection occurs, hazard communication requirements, electrical safety, fall protection, confined space entry and many others.

We can offer this training, with card certification, for clients who wish to take advantage of this special opportunity to get this valuable training on a schedule that meets your needs.

- Training at your office or work site to minimize costs of employee travel and missed work
- 10-Hour training can be spread out over several days, so employees are trained in smaller groups to minimize company disruptions
- 30-Hour training can be spread out over a six month time period to maximize employee productivity and lessen “down time”
- Certain topics can be custom designed to fit your particular training requirements
- Cards issued for each full time class attendee
- Immediate certificate of training issued with OSHA cards received within 4-6 weeks

OSHA 10 Hour: February 4-5, 2009

OSHA 30 Hour: February 9-12, 2009

Classes are being held at our Las Vegas Training Center. **Register Today!**
